DSAT IANTD DAN Instructor Trainer

1.0 TEC Deep

TEC Deep encompasses a team of highly experienced Instructor Trainers and Instructors, all of whom have been active in technical diver, instructor and diving emergency training for several years or more.

Our goal is to give potential technical divers and instructors the possibility to choose the right course at a wide range of dates throughout the year. Our courses are always conducted in facilities which meet ISO standards EN 14467 / ISO 24803 for diving as agreed by Egypt's Chamber of Diving and Water Sports (CDWS), the Austrian Institute of Norms and the European Underwater Federation.

TEC Deep operates mainly in Egypt but organises courses in other countries according to our clients' needs.

We do more than cover the minimum requirements of the different courses: we give you every opportunity to develop your skills and knowledge well beyond just what it takes to scrape through the different courses. The experience we gained while preparing many students and instructor candidates over the years has enabled us to understand all their needs in terms of proper information and guidance before, during and after their course.

Therefore, all candidates participating in technical courses with TEC Deep can be certain to receive an outstanding preparation for becoming a successful technical diver or instructor, or for managing diving emergencies.
